INDEX

January thru December

1970

SCIENTIFIC, ENGINEERING, TECHNICAL MANPOWER COMMENTS is a monthly news summary of current developments affecting the recruitment, training, and utilization of scientific, engineering, and technical manpower. It is published eleven times a year by the Scientific Manpower Commission in cooperation with the Engineering Manpower Commission.

Subscriptions are available at \$7.00 per year from the Scientific Manpower Commission, 2101 Constitution Avenue, N. W., Washington, D. C. 20418.

Betty Vetter - Editor
Eleanor Babco - Assistant to Editor
Susan Amos - Secretary

The first part of the paper discusses the importance of the study of the history of the United States. It is argued that a knowledge of the past is essential for a full understanding of the present. The author then proceeds to discuss the various factors that have shaped the development of the United States, including the role of the government, the influence of the economy, and the impact of the culture. The paper concludes by emphasizing the need for a continued study of the history of the United States in order to better understand the challenges of the future.

The Scientific Manpower Commission and the Engineering Manpower Commission of the Engineers Joint Council are non-profit corporations made up of Commissioners representing their member scientific and engineering societies.

The Commissions are charged with the collection, analysis, and dissemination of reliable information pertaining to the manpower resources of the United States in the fields of science, engineering, and technology; promotion of the best possible programs of education and training of potential scientists, engineers and technicians; and development of policies of utilization of scientific, engineering, and technological manpower by educational institutions, industry, and government for optimum benefit to the nation.
